

MAIKEL GARCÍA

Software Developer | Associate Degree in Computer Science

+58 412 164 1006 | garcia.maikelr@gmail.com | linkedin.com/in/maikel-gr | github.com/axforzi | axforzi.github.io

PROFESSIONAL SUMMARY

Associate Degree in Computer Science and Professional Software Developer specialized in the design, development, and optimization of backend architectures, process automation, and efficient data management. With a solid foundation in the Python ecosystem and modern frameworks, I possess a versatile profile and high technical adaptability. This allows me to successfully build everything from scalable web platforms and custom desktop solutions to structured database administration tasks. Oriented towards clean code writing, high performance, and agile resolution of complex problems.

PROFESSIONAL EXPERIENCE

Web Developer • Clin Media | 05/2025 - 10/2025

- Designed, developed, and deployed multiple functional websites optimized using the WordPress CMS within the context of the Kit Digital program.
- Managed technical administration of servers and websites, implementing security updates and hotfixes based on direct client feedback.
- Ensured responsive design standards, page load speed optimization, and production-level performance.

Freelance Software Developer • Self-Employed / Fiverr | 01/2024 - Present

- **E-commerce Platform (Moeka.store):** Designed and developed a decoupled web architecture using React for the frontend and Django for the backend, integrating payment gateways and technical SEO optimizations. (06/2024 - 12/2024)
- **Integration Plugin (MusicBee & Flow Launcher):** Developed a Python-based plugin to connect media player capabilities with a system launcher, implementing high-speed XML parsing scripts for instant queries over large media libraries. (01/2026 - 05/2026)
- **AI Assistant Plugin (Flow Launcher & Gemini):** Developed a multilingual Python plugin for Flow Launcher integrating Google's Gemini API, enabling fast AI queries with multi-model support, secure clipboard management, and a modular architecture. (12/2025 - 06/2026)
- **Web Scraping & Data Ingestion (Fiverr):** Created and deployed automated data extraction scripts using Requests and BeautifulSoup to collect structured video game database info, designing and modeling relational schemas in PostgreSQL/MySQL. (01/2024 - Present)

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), SQL (PostgreSQL, MySQL, SQLite), HTML5, CSS3
- **Frameworks & APIs:** FastAPI, Django, React, Tauri, REST APIs
- **Data & Scraping:** Requests, BeautifulSoup, Pandas, Data Processing, Entity-Relationship Modeling
- **Tools & OS:** Git, GitHub, Docker, Linux Environments (Fedora, Arch Linux), Local SLM/LLM Deployment

EDUCATION AND CERTIFICATIONS

- **Associate Degree in Computer Science (T.S.U.)** | Instituto Universitario de San Francisco
- **Graphic Design Certification** | Instituto Universitario de San Francisco (SIEX)
- **High School Diploma in Sciences** | Instituto Universitario de San Francisco
